

AnkiApp

ANKIAPP

<https://www.ankiapp.com/>

 **CATEGORY:** Action

 **GRADE AND SUBJECT:** All age groups and teachers.

 **SHORT DESCRIPTION:** AnkiApp is a flashcard and revision tool with premade cards and the option to create personalised revision flashcards.

READING TIME: 4 minutes

 **LEARNING GOALS:** AnkiApp offers flashcards covering different topics. Through flashcards, students can effectively revise what they have learnt and better memorise new information. The teacher can use existing flashcards or create their own, which can be more adapted to their classroom needs.

 **MOMENTS OF NEED OF THE TOOL:** Learning for the first time; expanding on what they have learned; when problems arise.

 **LEVEL OF DIFFICULTY (RATING) AND AGE LEVEL:** Easy, 6+

 **WHY USE THIS TOOL:** The flashcards are adaptable, but they also offer premade cards, so it caters to different needs. They are engaging because it is possible to add pictures and sounds in addition to words. The user can choose how many cards they want to use, and it is simple because you just need to flip the card and go to the next card. The user can monitor their progress in their revision efforts.

TOOL DESCRIPTION: AnkiApp is an app that allows the user (a teacher, a parent or a student) to create flashcards for revision with the addition of images and sounds in order to motivate the revision process. This tool offers premade cards that the user can search for instead of creating new ones. The flashcards have spaced repetition incorporated in them.

PREPARATION AND HOW TO USE THE TOOL: The app can be downloaded in IOS or android. The user must create an account to save the materials and progress. Once the user begins, they either choose a deck of flashcards to start studying or create their own. After the first question it shows if the user got the answers correctly. The user can also choose to see the answer and then the question. If the user gets a question right over and over again, the card is more spaced out and they appear less often.
